

Mandatory Reporter Training – Child and Dependent Adult Abuse

The Iowa Code, Chapter 93, designates the Iowa Department of Public Health to "review and approve mandatory reporter training curricula for those persons who work in a position classification that under law makes the persons mandatory reporters of child or dependent adult abuse and the position classification does not have a mandatory reporter training curriculum approved by a licensing or examining board." (The 2001 code language mandating an abuse education review panel was revised effective 2014). The purpose of the review process is to provide an objective method by which child and dependent adult abuse mandatory reporter curricula are reviewed and approve.
